To change User Codes

Press 9 and system master code, the system will then say either "Time and Date" or User Codes. If "Time and Date" Press B to move to the right and then when it says "User Codes" press # twice. If "User Codes" is first option press # twice. Select a user number, move forward by hitting B or back by hitting A. When you have the user number you wish to change press #. Enter the new 4 Digit Code. You cannot use an existing code, or 1234 or 4321. Please do not use address either, as it is used in the system. After entering the new code press #. Then press * 3 times until you get back to "User Codes". Press A until you reach "End/Exit Programming". Ready will be flashing. Press # to return to the system's Main Screen.

If you have any other questions, please call Global at (800) 446-2400.
